

INFANT BRAIN IMAGING STUDY

FOR IRB USE ONLY

IRB ID #: 201901013
APPROVAL DATE: 10/12/21
EXPIRATION DATE: 01/24/22

Have a child with autism and a new baby?

You can help us identify autism symptoms earlier in life via this NIH-funded study.

Families with an infant (6 months or younger) with an older full sibling diagnosed with autism. Expectant parents are encouraged to contact us.

Who Is Eligible?

About Your Visit

Your infant and a parent will:

- Travel to your region’s site when your infant is 6-, 12-, and 24-months old. Each visit includes developmental assessments and an MRI scan during natural sleep.
- Receive \$450-475 compensation and reimbursement for travel expenses for each in-person visit.
- Complete remote visits with questionnaires and a phone interview at 9- and 18-months old with \$50 in compensation.
- Complete LENA language recordings at 6-, 12-, and 18-months.
