

# EARLY YEARS STUDY

**The goal of this research study is to learn about how behaviors observed in newborns relate to meeting developmental milestones during the first years of life.**

## **What is involved?**

- Participants will submit newborn cry recordings and complete online surveys about baby's development through age 3.
- Some participants will be invited for an in-clinic visit at ages 2-4.
- Participants will be compensated for their time with up to \$265 in Amazon gift cards.

## **Who can participate?**

You can participate if you are an expecting parent, you are at least 18 years old, and someone in your immediate family has a diagnosis of or concern for autism spectrum disorder.
